12	WMM	24/04/2026	22/06/2026	Done, and the report is available
13	WWM	17/08/2026	15/10/2026	Done, and the report is available
14	WMM	30/08/2026	28/10/2026	Done, and the report is available
15	MMD	04/06/2026	02/08/2026	Done, and the report is available

PUBLIC HEALTH ACTION UNDERTAKEN AND REQUIRED

1. Step up surveillance activities on Mpox, Ebola VHFs and other priority diseases across the M/Districts
2. Prompt data and report entry into SORMAS and DHIMS 2
3. Use bar codes in all sample identification and transportation
4. All cases should be entered and samples created in SORMAS before the sample is transported
5. Intensify surveillance activities on all Priority diseases
6. Risk communication is ongoing to continuously raise awareness.
7. Intensify records review at the various facilities
8. Acute Flaccid Paralysis (AFP) Surveillance has been intensified across all M/Districts
9. Municipalities and districts are also encouraged to report on ILIs, although the West Mamprusi Municipal Hospital serves as the sentinel site.
